Change in Hours

Labor Day
Mon, September 3, 2012,
LIBRARY CLOSED

Regular hours begin
after Labor Day.

Summer Hours (Jun-Aug)

Mon-Thu	8:00am-10:00pm
Fri	8:00am-7:00pm
Sat	9:00am-6:00pm
Sun	1:00pm-7:00pm

Regular Hours (Sep-May)

Mon-Thu	8:00am-11:00pm
Fri	8:00am-7:00pm
Sat	9:00am-6:00pm
Sun	1:00pm-11:00pm

Inside this issue:

Henkel Physicians Exhibit	2
SIUSOM Annual Authors Exhibit	2
Good Reads	2
Featured Resource: Guide to NLM Mobile Resources	3
New York Times Donation	3
Library Hosts Disaster Preparedness CE Class	3

SIU School of Medicine

Back to School Special – Literature Searches Run for No Charge

Need information for a patient problem?

Researching a topic for a grand rounds presentation?

Writing an article for a journal?

The reference librarians are trained expert searchers of the medical literature and will develop and run searches at no charge for SIUSM faculty, students, residents and staff.

Databases included in this service:

- ◆ PubMed
- ◆ Web of Knowledge

◆ EbscoHost databases (Academic Search Premier, ERIC, Business Source Premier and Medline Complete)

◆ FirstSearch databases (WorldCat, ERIC, World Dissertations, ProceedingsFirst, PapersFirst and ArticlesFirst)

◆ Cochrane Library of Systematic Reviews.

Fee-Based Searches:

Other databases available through the Dialog Search Service will be billed for their online charges. These fee-based searches need prior

approval from the departmental fiscal officer unless personal payment is provided.

Search requests for others outside of SIUSM will be charged.

To Request a Search:

Searches can be initiated by filling out the online form at <http://www.siumed.edu/lib/forms/litsearch.html>

or by calling the Reference Desk at 545-2113.

Searches are usually completed within 24 hours and the results are emailed to the requester.

More Full-text Journal Articles Available

The Library has upgraded to **EbscoHost Medline Complete** from *Medline with Full-text*.

Medline Complete has an additional 600 unique titles not found in *Medline with*

Full-text and includes full text for more than 2,100 journals.

Medline Complete is available through the Quick Links on the Library home page (under EbscoHost Research Databases).

The full-text journals are also accessible through the Library's A-Z list and through PubMed using the Library's Find-it button.

A New Kind of Journal

The Library has a new subscription to **JoVE, the Journal of Visualized Experiments: General Section**.

JoVE is a peer-reviewed, video journal that is indexed in PubMed. The journal's goal is to increase the productivity of scientific research.

Early SIUSM reviewers were especially attracted to the high-level video protocols that were available and saw them as a good training tool for learners.

JoVE is linked through the Library's A-Z list and is available from off-campus.

The PubMed indexing of this title does not visibly differentiate between the different sections.

The header on the Journal's Web page does show what sections are available to SIUSM users (General only).

“..the hand-written correspondence shows how much medicine has changed and how enduring are the challenges.”

Henkel Physicians Exhibit

The Library is hosting a National Library of Medicine travelling exhibit: **The Henkel Physicians: A Family's Life in Letters**.

This exhibit highlights the personal correspondence among three generations of physicians in Virginia in the 1800s.

THE HENKEL PHYSICIANS
α **FAMILY'S LIFE in LETTERS**

The correspondence highlights events of the time, including the Civil War. The Drs. Henkel also testified in court; defended their prac-

tice from an influx of new physicians; and dealt with a range of medical maladies, including emergency care and public health initiatives.

Well before the age of e-mail, the hand-written correspondence shows how much medicine has changed and how enduring are the challenges.

SIUSM Annual Authors Exhibit

The 2012 Annual SIUSM Authors Exhibit will open on Monday, August 13.

Each year the Medical Library honors SIUSM faculty, researchers, students and staff

who have published a book or chapter in the last year.

This year 21 authors will be presented through a display of their eleven books.

Many other SIUSM authors

have published journal articles. Please check the library's home page to see a list of these authors and their publications. This list is updated monthly.

Medical Library Outreach

The Medical Library hosted an exhibit at the Immunization and Communicable Disease Conference in Normal, IL, on July 31st as part of its outreach program.

Library faculty highlighted National Library of Medicine

(NLM) products and services as well as the Library's role as a resource library for the National Network of Libraries of Medicine (NN/LM) Greater Midwest Region.

Upcoming Medical Library outreach exhibits include:

- Baby Day, August 26, 2012
- Walk to End Alzheimer's, September 22, 2012
- Memory Loss Conference, November 16-17, 2012

Good Reads

Malignant: Medical Ethicists Confront Cancer. Dresser, Rebecca, ed. New York: Oxford, 2012. [QZ 201 M251 2012]

Editor Rebecca Dresser was the bioethicist in residence at the School of Medicine this past March. She is a professor of Law and professor of Ethics in Medicine at Washington University, St. Louis.

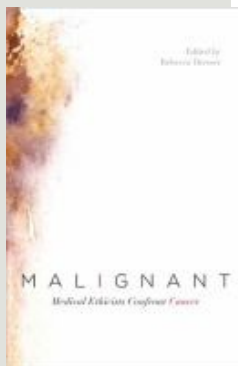

This fascinating book features contributions from sev-

en bioethicists: five who had cancer and three who cared for a spouse with cancer (one who was both). Their stories describe the professional-personal duality they encountered in their cancer experiences.

In her presentation at SIU, Professor Dresser described her decision to not participate in a clinical trial within the context of her knowledge of the clinical research pro-

cess. She described feelings of guilt in not choosing to participate, at the same time she was trying to optimize her chances for recovery as a patient.

Within a week of adding this book to our collection, we had four requests from other libraries across the country (from California to New York) to borrow it. The content is compelling and complex.

Featured Resource: Guide to NLM Mobile Resources

The number of mobile resources available from the National Library of Medicine (NLM) has skyrocketed in the last few years.

NLM has released a new mobile app that is a guide to NLM mobile resources and assists users in finding and using the NLM mobile apps and sites.

NLM Mobile: Guide to NLM Mobile Resources:

<http://www.nlm.nih.gov/mobile-app/>

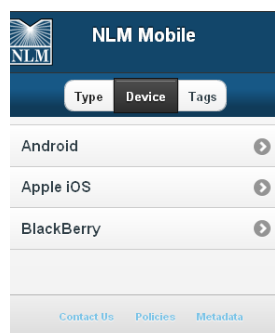

Display resources by:

- Type: websites or apps
- Device: Android, iOS, or Blackberry
- Tags: subjects

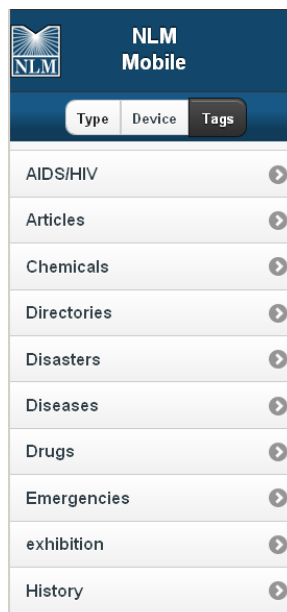

All NLM resources are free.

New York Times Donation

Through the generosity of community member, Vinod Gupta, Medical Library visi-

tors have access to a one-year subscription to the **New York Times** (Monday through

Saturday issues).

NYT issues may be found in the Browsing Area.

Library Hosts Disaster Preparedness CE Class

In cooperation with the Health Science Librarians of Illinois, the Library hosted the Medical Library Association CE class, Disaster Situations in an International Context, on July 10, 2012.

Fourteen librarians from central Illinois attended. John Scott and Pat Bittner, the instructors, have extensive experience in disaster management and work through the Center for Public Service Communications.

This course looks at the international disaster com-

munity, health information professionals' roles and responsibilities in pre- and post- disaster situations, and the type of information that may be offered or required to respond to real or perceived needs.

This class is one of several classes required to obtain certification as a "Disaster Information Specialist". This certification program is one of the efforts supported by DIMRC. The National Library of Medicine created DIMRC, the Disaster Information

Management Research Center, to support national emergency preparedness and response efforts, and to ensure continuous access to health information and effective use of libraries and librarians when disasters occur.

Disaster information and support can be found on DIMRC's web site at <http://disaster.nlm.nih.gov/> or contact the Medical Library Reference Desk: 217-545-2113.

Welcome to a New Academic Year

Welcome to the 2012-13 academic year! The arrival of new first and second year medical students and graduate students always provides the psychological start of the new academic year.

We have some new resources available (a video journal and more full-text articles), new exhibits, and a Back-to-School special: free literature searches! More on all of these topics are in the newsletter.

We're looking forward to getting to know new faculty, staff, residents, and students and reacquainting with others. Please let us know if you have any questions or need help with your information needs!
