## EXECUTIVE SUMMARY

- SIU SOM's first year (Y1) of medical school is comprised of three units: Cardio/Respiratory/Renal (CRR), Neural/Muscular/Behavioral (NMB), and Endocrine/Reproduction/Gastro (ERG).
- There were 76 total students in the Y1 cohort in AY 2019/2020
- Y1 asked students to evaluate each unit as a whole.
- Things we learned:
  - The tool used to evaluate units in AY 2019/2020 changed in AY 2020/2019. The tool for 2019/2020 does not lend itself to quick quantitative analysis beyond counts. The newer tool is positive growth.
  - Our units and our learning experiences within units are, on average, rated favorably by students.
  - We need to explore ways for increasing our response rates. Analysis of AY 2020/2019 summaries indicate response rates have increased, likely due to a more streamlined evaluation tool.

### SUMMARY OF STUDENT EVALUATIONS BY Y1 UNIT

Response Counts	
<b>Cardio/Respiratory/Renal (CRR)</b>	
What is your overall rating of this unit?	Excellent – 1 Very Good - 1 Good – 2
Have you personally experienced or witnessed abuse during this unit? If yes, briefly describe.	Yes – 0 No - 2
Did you get enough hands-on practice time doing clinical skills pertinent to this unit outside of your mentoring experience?	Yes - 4 No - 0
Did you feel prepared for the one-on-one patient encounters during the unit?	Yes – 4 No – 0
The self-assessment of the H&P DVD was a valuable learning experience.	Strongly Agree – 1 Agree – 2 Disagree – 1 Strongly Disagree - 0
I recommend holding the review for future classes.	Strongly Agree – 1 Agree – 2 Disagree – 1 Strongly Disagree - 0
